EMPLOYMENT

Oficina Nacional de Estadisticas	April 2019 – Current

Senior Software Engineer

- Creation of Web Apps using Vue.js and ASP.NET Core for automating manual business tasks.
- Creation of ASP.NET Core Services focused on performance to process thousands of requests per day.
- I introduced a Visual Studio Template to save time when starting new projects since it was a repetitive task.
- I introduced Docker to our team to help with the deploys of the ASP.NET Core & vueJs apps.

Software Developer	**Solvex Dominicana**	**September 2017 – April 2019**

- Creation of a Bot using cognitive services for the Department of education of the commonwealth of Puerto Rico to help Puerto Ricans get further information regarding education services.
- Creation of a Web app from scratch using Vue.js and ASP.NET that automated manual processes, prevented human mistakes, and increased the productivity of the user.

Junior Software Developer	**Mctekk**	**April 2016 – September 2017**

- I implemented a payment system for one non-profit company (Esperanza) that lent loans with low interest for the poor with an API built in node.js & used react.js for the front end.
- Created a VueJs app for a client that lends money to companies employees (CashDepoint).

EDUCATION

O&M Dominican University	2012 –2016

Dominican Republic
